A. Bilateral visitors
B. Bilateral tourists
N
Inference
Baseline (directed-pair clusters)
Unordered-pair clusters
Exporter and importer two-way clusters
Weidner-Zylkin bias correction
Sample and influence
Excluding the five largest exporters
Excluding top 0.1% mobility values
Dropping the 10 most influential pairs
Exact visitor-tourist common support
Time
2007-2019
Excluding 2009
Excluding 2008 and 2020
Excluding 2008-2009 and 2020-2021
Directed-pair linear trends
Mobility measurement
Same basis in both directions
One basis for the pair throughout
No basis switch in either series
Clean measurement (joint data-quality exclusions)
Trade measurement and basket
Exporter-reported trade
Average of importer and exporter reports
Upper-bound harmonization
Narrow-B (Narrow-A plus HS 852329/852380)
Narrow-A (FCS core codes, without heading 8523)
Without heading 8523
Observed-record detail screen
Positive trade only
Specification
RTA/FTA control
ln(trips) instead of IHS
IHS of thousands of trips
IHS of millions of trips
